

Guide to the Internet catalogue

1. Click the "catalogue" button from the main page menu on www.cabelcon.dk.

2. Now select from the main menu: **guided search via cable** or **product search**.

!! You can always get back to the main website by clicking **the logo** or the **main menu** link

3. Guided search via cable:

Choose this link, if you have a few pieces of information on your cable but need a matching connector. You can search on cable manufacturers, types, descriptions, various dimensions or the Cabelcon type.

Corning Cabelcon

- main menu
- guided search via cable
- product search
- read memory pad

Search for Cables

Manufacturer: ▾

Cable description:
Full or part of description.

	Minimum	Maximum	Sorted by
Inner conductor:	<input type="text"/>	<input type="text"/> in mm.	<input type="radio"/>
Dielectric:	<input type="text"/>	<input type="text"/> in mm.	<input type="radio"/>
Outer conductor:	<input type="text"/>	<input type="text"/> in mm.	<input type="radio"/>
Outer sheath:	<input type="text"/>	<input type="text"/> in mm.	<input type="radio"/>

Cabelcon Type (CC Type):

Search Cable for:

Connectors, Splice Connectors and Jumpers >>	Search
Splice Reducers and SR Jumpers >>	Search
Crimp Connectors >>	Search
Compression >>	Search

<< Back

Choose a **search button** for connector type: Connectors, splice reducers, crimp or compression connectors.

This gives you a list of cables matching your input. Select your cable from this list! The result is a list of connectors matching the cable. Now select your connector. This brings you to part **5** in this guide.

!! You can always get back to the main website by clicking **the logo** or the **main menu** link

4. Product Search

You can use **Product Search**, when you know the item number, the product description – or just parts of it.

If you know the Cabelcon type (CC-type) or if you want a list of connectors/adapters with a certain interface, this is also the place to start.

CABELCON

The result of your search will be a list of products, which matches your input. Click on the needed product..

Now go to part 5.

!! You can always get back to the main website by clicking **the logo** or the **main menu** link

5. The search result

You will now see a page containing a picture of your product with item number and information on sizes and dimensions.

The screenshot shows a web browser window displaying the Corning Cabelcon Product Catalogue. The browser's address bar shows the URL: `http://localhost/katalog/showconnector.asp?ProductGuid=59020300&cableid=&cable2id=`. The page content includes:

- Navigation Menu:** main menu, guided search via cable, product search, read memory pad.
- Product Information:** Connector: 5/8F-203, Item number: 59020300.
- Selected cable table:**

Cable manufacturer	Cable discription	CC Type
---	---	-203
- Dimensions table:**

Dimensions:			
Back Nut Hex in mm	18	Back Nut in mm	20,2
Body Hex in mm	18	Body in mm	20,2
(SR) Hex in mm	0	(SR) in mm	0
Total length in mm	62,4		
- Package Information:** Single package (Quantity: 1, Barcode: 5707957030573), Bulk package (Quantity: 54, Barcode: 5707957830579), Min. order (Quantity: 20).
- Product Image:** A photograph of a metal connector.
- Navigation Buttons:** Adaptors, Opposite connector, Tools/Accessories, Matching Cables, Add to memory pad, Mounting instruction, << Back.
- Footer:** Copyright © 2004 Corning Cabelcon A/S, CABELCON connectors logo.

This page also offers other options such as a **Tools/Accessories** button. These linked tools are specified to fit the selected product. Buttons are also available to find i.e. other connectors or cables to match your tools (reverse functions).

The **Mounting instruction** button will be visible if instructions are available for download. If not The **Cutting info** button will be visible instead to show the cable stripping dimensions.

The **Memory pad** button on top of the page makes it possible for you to store selected products for later printouts.

The **remaining** buttons allow you to go reverse to find matching adaptors, cables and opposite connector

!! You can always get back to the main website by clicking **the logo** or the **main menu** link
