## Win a weekend in wonderful Copenhagen .....

Copenhagen is the perfect city for shopping with something for everyone. Enjoy the magical atmosphere in Tivoli where everything is covered in light and walk along the old pedestrian streets. See all the beautiful shops, buildings and places and experience the relaxed way of life.

Copenhagen, the capital of Denmark is Scandinavia's largest city, and part of the most dynamic region in Northern Europe. The city is one of Europe's oldest and most wonderful capitals with a royal touch.

### This is how to win:

The Corning Cabelcon newsletter has been sent out to our readers for several years in different sizes and layouts. As we wish to give the most relevant information to our customers and users – we now need to know your personal opinion. To this newsletter we have attached a simple questionnaire, which we kindly ask you to fill in. If your newsletter is circulated – please feel free to copy the questionnaire. We will draw ten prizes among the received answers.

### 1<sup>st</sup> prize

1<sup>st</sup> prize will be “A weekend in Wonderful Copenhagen” for two at a value of max. 1000 €. This prize includes an economy flight from the winner's local destination, a double room in a very nice four-star hotel in Copenhagen and an evening in the world famous

Tivoli Garden (season April – September) including a nice dinner in one of the fine restaurants.

### 2<sup>nd</sup> to 10<sup>th</sup> prize:

The following nine prizes will be a unique Cabelcon Candle Light (see picture on the front page).

Want to meet Copenhagen? So please sharpen your pencils and go ahead. We need your questionnaire back before 1<sup>st</sup> of March.

*This draw is not open to Corning employees, their immediate families or others close related to Corning or it's companies. The draw will take place 1<sup>st</sup> March. The winners will be directly informed and the results will also be published on our website.*

## News

### New range of UltraEase™ Connectors

Corning Cabelcon now presents the complete range of UltraEase™ compression connectors made by Corning Gilbert.

The range includes five sizes of the F-connectors to fit almost any RG6/59 cable.

The new UltraEase™ F-connectors are very easy to install with the lowest activation force available in a high performance compression connector.

#### UltraEase™ BNC & RCA

Also a range of UltraEase™ BNC and RCA connectors are available. The BNC and RCA connectors are offering a unique push-pin technology to ensure that the cable is properly installed and in place before the compression is done.

Also the F male connector for mini coax cables includes a push-pin system.

The RCA connectors are partly gold plated for improved performance.

#### Safe Installation

**Before compression:** The post forward design allows easy verification that the cable dielectric is flush with the post face prior to compression.

It also ensures that the connector cannot be installed without activating compression.

**After compression:** The connector post has a conventional recessed position. This is another feature that helps the technician to install the connector correctly every time.

Black: GF-UE-59, Green: GF-UE-59Q, Yellow: GF-UE-6, Silver: GF-UE-6Q, Blue: GF-UE-5.1

The UltraEase™ RCA and BNC connectors are available for RG59/6 and mini coax series of cables.

Much more detailed information on these fine products can be found and downloaded from our website at [www.cabelcon.dk](http://www.cabelcon.dk).

Please also refer to the internet catalogue for more information on available tools for the range of UltraEase™ connectors.

UltraEase™ F, RCA & BNC connectors are also available for mini cables

Before compression

After compression

## CX RG11 jumper cable now available

Corning Cabelcon is now introducing a new range of high performance RG 11 jumper cables. These CX jumpers are mounted with our newly developed "compression type" connectors based on the proven CX4 technology.

The CX compression connector design and the assembly process ensure that there are no blind entries during installation. This results in a perfect, error-free product.

The inner conductor centre seizing system adapted from our CX4-line guarantees installation without leaving any scratches on the cables inner conductor.

Another advantage of the CX4 jumper is the smaller physical size of these connectors which make them fit better in places where space is limited.

The cables are flame retardant RG 11 copper or aluminium shielded cables with a solid copper inner conductor, allowing up to 15 Amp. Power rating.

The new CX jumper cables are available in many types and sizes.

Please note that the connectors used for the jumpers are made for factory installation only. They cannot be installed in the field and are therefore only available on the CX jumper cables.

## Cabelcon awarded "Best Hardware Company"

We are proud to announce that Corning Cabelcon has been awarded "The best hardware manufacturer in Denmark" for the second year in a row – by the daily financial newspaper "Boersen".

Cabelcon was placed first on the top 200 list in front of IT companies such as Ericsson, Nokia, Siemens, IBM, Scientific Atlanta, Cisco and many other well known companies.

The rating was based on a combination of many figures such as turnover, result, growth, efficiency, number of employees etc.

This great result has been achieved not least thanks to the close cooperation with our many loyal distributors, customers and the many end-users preferring to go for the original Cabelcon quality and the latest designs in connectors.

For our customers it also means that we are in the finest position to serve you with the quality products and service you may require. And it confirms our position to serve you with the most reliable and state of the art connectors at the connector market today.

*Part of the top 200 hardware companies in 2005 - according to Boersen News*
