New 30 seconds express connector

*The new connector.
The fitting tool is shown in the back*

At the ANGA show this year Corning Cabelcon introduces a brand new type of coaxial connectors for welded cables.

This new innovative design will be unique in the worldwide CATV connector market. The new line of connectors is based on the flaring principle, which forms a 100 % watertight connection on the cable.

By using the likewise newly developed and low priced installation tools, the connectors are easily installed in

seconds. These tools also ensure an effective, long-lasting seal, as each tool forms the cable to the exact shape of the matching connector body.

The new design will over time be available for both 50 and 75 Ohms welded cables. A worldwide patent is pending.

See the new connector at our stand no. A14.

New CX3 All Size compression tool

This new CX3 All Size compression tool fits all CX3 types and sizes of compression connectors. The tool is easy to use with changeable plunger tips.

CX3 All Size tool will be available from July 2005. Item no. is 98029067.

CX3 All Size compression tool with changable plunger tips to fit F, E, IEC and BNC connectors.

*Vertical position for RG 59/6
Horizontal position for RG 7/11*

Articles

RF connectors - an important and growing part of Corning Cabelcon's business.

Most of our readers know that Corning Cabelcon is the largest manufacturer of connectors for CATV in Europe. What is probably less known is that development and production of 50-Ohm Premium Class RF-connectors for cellular applications is a fast growing business as well.

Corning Cabelcon is manufacturing a wide range of RF-connectors for large OEM customers, but we are also supplying connectors under our own Corning brand.

The Corning RF connectors are remarkable by their high and stable performance under extreme conditions. Also the user-friendly installation is notable, as the Corning RF connectors can be safely installed in a few seconds.

*50 ohm connector examples, from left:
7/16 F for 1-5/8" Annular cable, 7/16 F for 7/8" Annular cable & 7/16 M for 1/2" Superflex cable*

More information on our Premium Class connectors such as product sheets, installation instructions &

typical specifications are available for download from our website at www.cabelcon.dk

New cables added to Cabelcon's standard jumper range

Corning Cabelcon's jumper market is fast growing both within crimped jumpers and HQ™ compression jumpers. Customers and installers recognise the benefits of a safe and timesaving installation combined with an optimal performance.

It is vital in the digital upgrading of networks that screening and return path performances are perfectly controlled. All Corning Cabelcon's jumper assemblies are developed to fulfill all demands in the EN standards.

New cable types have been added to Cabelcon's wide range of jumpers.

Corning Cabelcon has included new cables in the standard programme, such as a white flexible RG59 PVC cable.

Please find an overview and specifications on our standard range of cables on our website www.cabelcon.dk

Customer specified jumper assemblies are made on request. Please contact your distributor for special orders.

Profile

One of Corning Cabelcon's colourful employees is Reimer Paulsen, our territorial manager for Germany, Switzerland, Austria and Turkey.

Reimer Paulsen has been with Cabelcon for 8 years and is one of the best known representatives of Cabelcon. A professional attitude, an excellent customer service - and not least enthusiasm and hard work - lie behind Reimer's success in business relations.

Reimer Paulsen was awarded membership of the "Presidents Sales Club" by our parent company Corning Inc., USA, in 2004.
