Triple Play Technology at ANGA Cable 2006

One of the themes at this years ANGA show will be the “Triple Play” technology, products and applications and Cabelcon will be no exemption. We invite you to visit us – and to see our latest products developments for Triple Play Networks, Broadband and for wireless applications.

This will include examples from our latest generation of the CX3 compression programme, the CX4 hardline programme, our latest installation tools and also examples from our wireless connector programme.

From Corning Gilbert USA we will introduce the latest generation in UltraEase™ compression connectors for CATV, Audio/Video and broadcast applications.

As something new – we will also present examples from the wide range of tiny Microwave Connectors – manufactured by Corning Gilbert, USA and represented in Europe by Cabelcon.

Many of Corning Cabelcon’s distributors and partners will be present at the ANGA show. Their stand numbers are listed on the back page of this newsletter.

We look forward to see you at stand no. B15.

Product News

UltraEase™ Headend Series

The Corning Gilbert UltraEase™ family has grown to include two new connectors designed specifically to fit high braid headend cables. The new additions are an F male pin-connector GAF-UE-59-HEC and a BNC connector GA-BNC-UE-59-HEC.

These high quality connectors incorporate a pop-up pin for ease of cable installation.

Description:	Item no.:
GAF-UE-59-HEC	99909305
GA-BNC-UE-59-HEC	99909355

*5/8M-AC power cable,
item no. 91570020*

5/8M-AC Power Cable

Corning Cabelcon introduces a new 5/8M-AC power cable with two meter 2 x 2.5 mm² pre-installed cable with terminals. The power rating is 17 Amps.

The cable connection is waterproof (IP X8 – 1 meter/24 hours) and is ready for connection to the network through a 5/8F AC port in amplifiers and trunk splitters.

Description:
5/8M-AC with 2 m power cable
Item no.: 91570020

Projects

Corning Cabelcon in London Underground

Corning Cabelcon's UK distributor, Webro Cable & Connectors has recently been awarded the contract to supply high quality cable & connector products to London Underground for the prestigious upgrade and refurbishment programme.

Many types of systems are being used and therefore many types of cables and connectors required. These include Fibre Optic, Coaxial 75 Ohm, Data, Telecom, Fire Alarm and Coaxial 50 Ohm.

Corning Cabelcon is supplying connectors within the wireless systems, used for e.g the platform announcement microphones on each station within London Underground.

All the cables and connectors that are being supplied have to meet the very high and stringent fire and smoke testing requirements of London Underground.

This project is on going for the next seven years.

Webro staff have conducted connectorisation training for "London Underground" installation engineers in order to ensure that the correct tools and termination techniques are used and utilised throughout the installation. The qualified installation work and the proven quality of Cabelcon connectors ensures the reliable and long lasting connections.

Corning Cabelcon introduces Six Sigma

Corning Cabelcon has over the last year adapted the Six Sigma methodology, focusing on optimal quality and effective processing. Twelve experts have been educated at Corning Cabelcon to keep focus on high quality in products, processes and services.

This will ensure that our customers get the optimal quality every time.

Customer Service Force

We are happy to announce that our Customer Service Department has been strengthened with new management & more assistants. Berit Rosendahl has been appointed our new Customer Service Manager. This move reflects our commitment always to give our customer service the highest attention.

10 years on the Internet

As one of the very first companies in the business – Cabelcon introduced it's website now 10 years ago. Our site has grown to be an important part of the daily service to our customers and end-users - not least the existence of our widely used Internet Products Catalogue.
